Latex

1662, "body fluid," from L. latex (gen. latidis) "liquid, fluid," probably from GK. latex "drops," from PIE base *lat- "wet" (cf. M.Lit. latē "beer," Welsh ladd "mud, mire," Lith. latakas "pool, puddle," O.N. lappa "drip"). Used 1835 to mean "milky liquid from plants." Meaning "water-dispersed polymer particles" (used in rubber goods, paints, etc.) is from 1937.

LaTeX language, text, tool
(Lamport TeX) Leslie Lamport's document preparation system built on top of TeX. LaTeX was developed at SRI International's Computer Science Laboratory and was built to resemble Scribe. LaTeX adds commands to simplify typesetting and lets the user concentrate on the structure of the text rather than on formatting commands.

`@@TeX` is a LaTeX package for bibliographic citations. L^amp^ut's LaTeX book has an exemplary index listing every symbol, concept and example in the book. The index in the, now obsolete, first edition includes (on page 221) the mysterious entry "Gölkersen, Ellen, 221". The second edition (1994) has an entry for "infinite loop" instead.

["LaTeX, A Document Preparation System", Leslie Lamport, A-W 1986, ISBN 0-201-15790-X (first edition, now obsolete)].

Latex

Lac^{tes}"cence *n.* [Cf. F. *lactescence*.]

1. The state or quality of producing milk, or milklike juice; resemblance to milk; a milky color.

This incandescence does commonly ensue when . . . fair water is suddenly poured upon the solution, —Boyle.

2. (Bot.) The latex of certain plants. See Latex.
